### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Katharyn E. Owen, Reg. No. 62,849, on September 1<sup>st</sup>, 2009.

The application has been amended as follows:

#### IN THE CLAIMS:

**Claim 1, line 9:** before the period "." insert: -- ; and the at least one detector module further comprising a module carrier having an inner space for the electrical unit and having a cable duct for at least one optical fiber cable --.

**Claim 8:** delete the claim in its entirety.

**Claim 9, line 1:** replace the term "claim 8" with: -- claim 1 --.

**Claim 19, line 3:** after the term "module" insert: -- , where the radiation sensitive detector module comprises a module carrier having a cable duct for at least one optical fiber cable --.

**Claim 20, line 4:** delete the term "and".

**Claim 20, line 6:** after the term "elements" insert: -- ; and  
a module carrier having an inner space for the electro-optical transducer and the opto-electrical transducer and having a cable duct for at least one optical fiber cable --.

*Allowable Subject Matter*

Claims 1-7, 9-13 and 15-21 are allowed.

The following is an examiner's statement of reasons for allowance:

The examiner agrees with Applicants' arguments, see pp.8-9 of the Remarks; specifically, that the prior art of record neither teaches nor reasonably suggests the detector arrangement that further has a module carrier having an inner space for the electrical unit and having a cable duct for at least one optical fiber cable, as recited in former claim 8, now required by the combination as claimed in **claim 1**, as amended above.

Claims 2-7, 9-13 and 15-18 are allowed by virtue of their dependencies.

Similarly, the prior art of record neither teaches nor reasonably suggests a detector module or method of use, where the detector module has a module carrier having an inner space for the electro-optic and opto-electric transducers and having a cable duct for at least one optical fiber cable, where the electro-optical transducer generates optical output signals indicative of radiation detected by the one or more detector elements, and where the opto-electrical transducer receives input signals and supplies the signals to at least one of the detector elements, as required by the combinations as claimed in each of **claims 19 and 20**, as amended above.

Claim 21 is allowed by virtue of its dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ruud (Us 5,414,747) teaches optical fiber scintillating elements in an x-ray detector.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to THOMAS R. ARTMAN whose telephone number is (571)272-2485. The examiner can normally be reached on 9am - 5:30pm Monday - Friday.
